SUMMARY

AI engineer building agentic development systems and using them to deliver web and iOS products. Co-founder of Stylefinden and independent developer of WakeSay, with end-to-end ownership of product architecture, AI integrations, application development, automated testing, and release workflows.

EXPERIENCE

Co-Founder · AI Engineer & Full-Stack Developer

Stylefinden · Fashion discovery and editorial platform March 2026 – Present

- Built and maintain the web architecture, backend services, content management, and release workflows for a platform spanning stylefinden.com, stylefinden.de, and stylefinden.co.uk.
- Designed an agentic development system with Claude Code and Codex, combining project memory, specialized agents, reusable skills, MCP integrations, model selection, and automated verification.
- Integrated four LLM workflows using Anthropic and the Vercel AI SDK, with Zod validation for structured outputs, request rate limiting, and human review.
- Developed automated Vitest and Playwright tests covering UI, APIs, localization, and SEO behavior; integrated change verification into the release workflow.
- Implemented localization, canonical/hreflang architecture, product-feed ingestion, affiliate links, and analytics integrations for the multi-market platform.

SELECTED PROJECTS

WakeSay

Independent developer · Preparing for App Store release

Swift · SwiftUI · AlarmKit · OpenAI TTS · Supabase · RevenueCat / StoreKit

Built a native iOS alarm and morning-routine app with AI voices, wake-up challenges, and shared voice messages. Implemented alarm scheduling, backend services, subscriptions, widgets, and Live Activities, supported by automated tests.

VisualPlate

In development · Private repository

SwiftUI · VisionKit · OpenAI Vision · Gemini Flash · Supabase

Built an iOS prototype that scans menus to provide dish information. Combined OCR and image recognition with location-aware analysis, caching, and user feedback.

Museum of My Mind

Live

Next.js · React · TypeScript · Cloudinary · Vercel

Built a photo archive with a full-screen gallery and connection-aware incremental loading. Integrated Cloudinary media delivery and added Vitest and Playwright tests.

TECHNICAL SKILLS

AI & agentic systems: Claude Code, Codex, MCP, Anthropic API, OpenAI API, Vercel AI SDK, structured outputs, context management, and verification workflows

Web & mobile: TypeScript, JavaScript, Swift, React, Next.js, Node.js, SwiftUI, REST APIs, Tailwind CSS

Data & infrastructure: Postgres, Supabase, Sanity, Upstash Redis, Resend, Vercel

Testing & delivery: Vitest, Playwright, Zod, ESLint, Git, automated testing and release workflows

EDUCATION

Selçuk University · Computer Programming · Associate Degree · 2022–2024 · GPA: 3.13/4.00

Istanbul University · Additional coursework in Web Design & Coding

LANGUAGES

Turkish: Native · English: B2
